1 Representation and manipulation of conceptual, temporal and geographical knowledge in a museum hypermedia system

Carl Taylor, Douglas Tudhope, Paul Beynon-Davies

September 1994 **Proceedings of the 1994 ACM European conference on Hypermedia technology ECHT '94**

Publisher: ACM Press

Full text available: pdf(845.46 KB)

Additional Information: [full citation](#), [abstract](#), [references](#), [citings](#), [index terms](#)

This paper discusses a semantic database approach to museum hypermedia systems based upon binary relations, with a restricted set of abstraction relationships. We describe examples of schema, queries and navigation aids for a prototype system designed as a social history museum exhibit, with around one hundred historical photographs. Media items are classified according to conceptual, temporal and geographical schema which attempt to model the changing nature of geography over time. The app ...

Keywords: knowledge based hypermedia, museum information systems, navigational aids, semantic closeness, semantic modelling, temporal & geographical knowledge

1 A model for next generation hypermedia systems

Hermann Maurer, Ivan Tomek

April 1991 **Proceedings of the 19th annual conference on Computer Science CSC '91**

Publisher: ACM Press

Full text available:  pdf(1.15 MB)

Additional Information: full citation, references

2 Active documents combining multimedia and expert systems

Mildred L. G. Shaw, Brian R. Gaines

October 1994 **Proceedings of the 12th annual international conference on Systems documentation: technical communications at the great divide SIGDOC '94**

Publisher: ACM Press

Full text available:  pdf(1.26 MB)

Additional Information: [full citation](#), [abstract](#), [references](#), [citings](#), [index terms](#)

An active multimedia document publication system is described which integrates a number of different representation technologies to provide a medium offering a wide spectrum of usage, including new forms of scholarly communication. The capabilities range from emulation of current paper publication, through electronic document delivery on the Internet or CD-ROM, multimedia inclusion of video and sound, hypermedia linkage, to formal knowledge representation for simulation and inference. Aspec ...
